

## Trapezoid Details

A Trapezoid is not true a Triangle. Each unit has a Short Leg - Base - Tall Leg

\* A spreader bar will automatically be added for a Lip Frame window over 42" in width and a Lip Frame Trapezoid over 30" in width. Under either width is optional.

All Measurements need to be presented from the outside looking in. Be sure to provide the "**Actual Daylight Opening**" measurement for each opening. Please provide a rough drawing of your trapezoids as well. This will help insure proper orientation of your units.

Since trapezoids are shape oriented, each unit will need to be installed into the exact opening it's specific measurements are provided for.

You must provide measurements based on the following configuration:

**Short Leg x Base x Tall Leg** and, or **Tall Leg x Base x Short Leg**

### TRAPEZOID SIZE LIMITS:

Min width 12", Max width 72"  
Min. Short Leg height 6" x Max Short leg height is 34"  
Max tall leg height 54".
